

**REMARKS**

Claims 1-13 are pending in the application. By this Amendment, Claims 3, 7, 8, 9, 10, 11, 12 and 13 have been amended to delete multiple dependency. The title has been amended and the Abstract has been added to reflect that of the corresponding International Application.

A clean copy of the Abstract is attached hereto.

No new matter has been introduced.

Applicants believe that no fee is required for this submission. However, should a fee be due, please charge such fee to Deposit Account No. 50-0548.

Respectfully submitted,

Matthew Johnston

## ABSTRACT

The invention device is directed to a Bowden-type cable containing a cable (14) which is provided with proximal (14P) and distal extremities arranged in a jacket (18) having proximal (18P) and distal extremities blocked by proximal (20P) and distal arresting units. At least the first extremity (18P) of the jacket (18) is connected to the first arresting unit (20P) with the aid of a liaison unit (22) which is arranged on the first extremity (18P) of the jacket (18). In a preferred embodiment, the liaison unit is moulded on the first extremity (18P) of the jacket (18) and welded by ultrasound to the first arresting unit (20).
